Continuation of Substance of Interview including description of the general nature of what was agreed to if an agreement was reached, or any other comments: Applicant discussed how the prior art does not recite adjusting, before the control information is received, at least one element of the control information according to a predetermined time pattern including time elements having a characteristic profile in terms of the state of the mobile communication system, thus forming adjusted control information. Meskanen does not teach these features. In addition, applicant discussed how Meskanen does not explicitly disclose that control parameters transmitted by the network (RXLEV\_ACCESS\_MIN, LSA\_RXLEV\_ACCESS\_MIN, LSA\_CAMPING\_MARGIN) are changed according to the time restrictions. In other words, Meskanen does not explicitly disclose adjusting control information according to a predetermined time pattern, as recited in the pending claims.
